Redland CITY COUNCIL

12 days of Christmas

The low waste way
My true eco-elf gave to me...

1
Stock up on rechargeable batteries - Once off batteries cannot be disposed of in any of your bins

2
Plant a real Christmas tree in your backyard and put the trimmings in your green-lid waste bin

3
For gifts carefully protected by polystyrene, take it to the Waste Transfer Station to give it another life

4
A trip to Recycle World for presents that can be up-cycled

5
Give the gift of experiences, reduce the gift of things to avoid unwanted presents and less wrapping

6
Indulge this season and increase your recycling appetite to a larger yellow-lid recycling bin

7
Less jingle in your bins this Christmas and avoid single use plastics plates and cutlery

8
Give the kids the pet they've always wanted - it eats their unwanted veggies too - a worm farm

9
Scrunch up that aluminium foil covering your left overs into a fist sized ball and pop it in your recycling bin

10
Decorate your home with nature - use green clippings to create your festive spirit and place in the green-lid waste bin.

11
Indulge in your Christmas dinner without the waste - get meal planning to be waste guilt free

12
Stuff those stockings without the wrapping - Buy re-usable santa sacks or cover up presents without the paper wrap
