

## 11 PLANNING & POLICY COMMITTEE 14/4/2010 - RECEIPT AND ADOPTION OF REPORT

Moved by: Cr Bowler  
Seconded by: Cr Reimers

That the Planning & Policy Committee Report of 14 April 2010 be received.

CARRIED

### 11.1 PLANNING AND POLICY

#### 11.1.1 REDLANDS 2030 COMMUNITY PLAN - FINAL

**Datworks Filename:** CS Redlands 2030 Community Plan  
**Attachment:** [Attach 1 - Redlands 2030 Community Plan - Final](#)  
[Attach 2 - Local Government Act 2009 & Regulations](#)  
[Attach 3 - Performance Measures](#)  
**Responsible Officer Name:** Roberta Bonnin  
Manager Community & Social Planning  
**Author Name:** Colette Torrance  
Community Plan Project Manager

---

#### EXECUTIVE SUMMARY

Redlands 2030 Community Plan was endorsed in principle by Council on 27 January 2010, for the purpose of graphic design and formatting; supporting the draft of the Corporate Plan for public consultation; and considering the financial impact of Redlands 2030 in line with draft State Government community planning regulations.

The impact of Redlands 2030 Community Plan on Council's financial forecast, long term financial plan and long term asset management plan has been considered by Council officers who are able to recommend that the Community plan now be formally adopted by Council.

The development of a project plan to guide the embedding of the community plan into Council's core business has now commenced, along with planning for the launch and distribution of the plan to the community, following its' graphic design and publication.

#### PURPOSE

The purpose of this report is to seek Council adoption of *Redlands 2030 Community Plan: creating our future* (Attachment 1), in accordance with the Local Government Act 2009 and draft Regulations (Attachment 2).

---

## BACKGROUND

In June 2008 Council approved a planning framework and associated budget for Stage 1 of the development of the Redlands community plan – a project to set a long term strategic vision for the Redlands based on community values and views. In June 2009 Council approved the budget for Stage 2 – to undertake further consultation to finalise the draft community plan and produce a final plan for Council adoption. The final Redlands 2030 Community plan was endorsed in principle by Council in January 2010 for the purpose of:

- Allowing the content to be graphically designed and formatted for final Council endorsement
- Supporting the draft Corporate Plan for public consultation
- Considering the financial impact of Redlands 2030 in line with draft State Government community planning regulations

## ISSUES

### Strategic Vision

Under the *Local Government Act 2009* all local governments in Queensland must develop a community plan by December 2011. According to the Act, a long term community plan is a document that *outlines the local government's goals, strategies and policies for implementing the local government's vision for the future of the local government area, during the period covered by the plan*. The draft regulations require that the contents of the plan consider local and regional issues, economic development, environmental management, governance and social wellbeing. The phases for developing a community plan are also outlined: intelligence gathering; community input; community vision; community validation; and policy adoption.

When Council embarked on the journey of developing a community plan for Redlands City, Council endorsed a process which would bring interested parties together to explore current issues and future aspirations and goals. The Redlands community plan was to have three functions: to *provide* a vision for what the community aspires to be; to outline key goals and indicators that would inform Council's Corporate planning and policies; and to provide grounds on which the community and other partners could base future endeavours. Sustainability, strong communities and Redlands culture and values were core principles underpinning the project plan and were reaffirmed by the community in the engagement process.

Anticipated planning outcomes were as follows:

1. A vision for the City with clear goals and outcomes
2. Indicators to measure progress
3. Active participation by all sectors of the community
4. Community and Council commitment to the Community Plan

5. Preparation for strategic alignment of Council's Corporate Plan to the Community Plan
6. An integrated approach to planning
7. Enhanced community capacity, knowledge and understanding at City-wide and local levels
8. A framework for future local and neighbourhood planning
9. Identified opportunities for partnership and ongoing collaboration with community, government and industry stakeholders
10. Excitement generated by new relationships between Council and the community

*(From Redland City Community Plan Project Proposal 18 March 2008)*

Investigations of the four themes of the planning process, Economy, Environment, Society and Governance using the Oregon model of community planning were supported by an explicit intention to work with the community to develop a more sophisticated understanding of the complex issues associated with planning and decision-making in regard to growth and development. Community building processes were also utilised so that the community would have the opportunity to increase their skills and assist forward thinking and connections between people, places and organisations.

The Redlands community responded by saying, in summary, that they want a well designed, vibrant city of mainland and island communities, each with distinctive character, heritage and lifestyles. The vision calls for minimising the built footprint and limiting population impacts. It will be easy for people to move around the city using efficient transport and connected pathways, and the Redlands will show leadership in green living initiatives. Redland communities will be strong and connected with opportunities for people of all ages and backgrounds, and a robust local economy with a wide choice of jobs and educational opportunities. Through good citizenship and open government decisions are made that are just, and contribute to social wellbeing and sustainability.

This paragraph paraphrases the community's broad 20 year vision which is expressed more fully in the Redlands 2030 Community Plan and in its eight outcome areas with associated goals, indicators and breakthrough projects. Predominant themes throughout the plan are the community's concerns about maintaining character, lifestyle and the natural environment. Limiting population growth and urban expansion were carefully weighed by the community with the need to provide modern, well-distributed infrastructure and transport services, affordable housing, and a mix of small businesses and low impact industry.

The plan contains many challenges: containing population size and managing housing density while preserving character and lifestyle; providing for the specific needs of island living; preserving the biodiversity of the natural environment and the

red soil and farmland which is part of the Redlands heritage; having local government strategies to sustain a vibrant economy and green living; and establishing better partnerships with the State and Federal governments to assist Council to deliver on the plan. While the new Corporate Plan will reflect Council's delivery of the strategic directions outlined in Redlands 2030, Council's review of the Redlands Planning Scheme will be seen by the community as a major statement of Council's commitment to achieving the community's long term vision.

### **Summary of Engagement processes**

The *Local Government Act 2009* draft regulations require that Council must be satisfied that the community plan outlines the engagement processes undertaken by the local government with the community in the development of the plan, and that Council has complied with its community engagement policy in preparing the plan. The processes of engagement, developed in accordance with Council's Community Engagement Policy and Strategy 2007, have been well documented in reports to Council throughout the Redlands 2030 community planning process. A summary of engagement activities is outlined again in brief for the purpose of this report.

The processes of engagement to develop the Redlands 2030 Community Plan were designed to address the methodology and performance measures contained in the Community Plan Project Plan 2008. Success criteria are outlined below with more detailed information on specific targets provided in Attachment 3:

- Diversity and depth of engagement;
- Project is completed on time and within budget;
- Councils commitment to process;
- Strong community, strong city.

#### Phase 1

This engagement phase achieved in excess of 2,500 community members participating in visioning workshops, youth activities, phone, mail and internet surveys, web forums, submissions by both individual and groups, and resident mail-in postcards. Events occurred in locations across the Redlands, from the Southern Moreton Bay Islands and North Stradbroke Island to urban and rural settings on the mainland. In addition, an arts program, Stories of the Redlands, brought together artists and residents to explore and express their values and visions through the medium of song, film, painting, sculpture, photography and the written word.

#### Phase 2

Feedback on the Redlands 2030 Consultation Draft culminated in 679 community responses during a six week period. The consultation process included newsletters with surveys distributed in the Bayside Bulletin, presentations to community organisations, school bag drop surveys, Redlands 2030 displays attended by Council Officers in key community venues, media advertisements and the opportunity for people to view and respond to hard copy and online versions of the plan.

During both phases of engagement the Community Feedback Network, an on-line group of over 320 residents were surveyed to provide their views on key issues that had arisen during the consultation process and their support for contents of the Redlands 2030 Consultation Draft. The Community Reference Group consisting of 46 registered members, who were seen as a representative voice for the various communities living in the Redlands met regularly to provide input and feedback on the progress of the plan and to assist in the drafting process.

### **Production of the final plan**

Graphic design and formatting of Redlands 2030 Community Plan as endorsed in principle by Council on the 27<sup>th</sup> January is well under way, based on the design concept, "Real people and real places – working together to create our future". The finished publication will be completed in late April and will contain text, images and graphics with appropriate visual language for the Redlands community, an effective functional layout for the complex hierarchy of content and formatting of the document for print, web access and CD distribution. The formatted version will be launched in May.

### **Corporate Planning**

Council's Corporate Planning, Performance and Risk Group has ensured that Redlands 2030 Community Plan has been used as the basis for the development of Council's new Corporate Plan. Workshops with Councillors, Council officers and members of the Redlands 2030 Community Reference Group directly addressed the outcome areas, priorities, goals, breakthroughs and indicators as outlined in the Redlands 2030 Consultation Draft. This input was then updated in accordance with the revised version of the Redlands 2030 Community Plan which was endorsed in principle by Council on the 27th January 2010. The draft Corporate Plan was presented to Council for approval for public consultation in February 2010.

### **Financial Consideration of Redlands 2030 Community Plan**

A working group of senior managers was established to consider the financial impact of Redlands 2030 Community Plan and the impact on long term asset management. The working group looked at four financial planning processes and the breakthroughs identified separately in the Community Plan. Their response is as follows:

1. Council's Corporate Planning Process: Corporate Planning Performance and Risk produced a Corporate plan workshop report which identified Council's resource capability against each of the priorities and goals of the draft community plan. Most of the goals received a green light - ie that Council currently has plans and resources in place and is currently delivering strongly against the goal. Some goals received an amber light - ie some plans are in place but additional resources may be required. A small number of goals received a red light – ie no specific plans, strategies or resources are currently in place and the goal might be difficult to achieve.

While the Corporate planning process identified that not every community plan goal is achievable within current resources, it also demonstrated that in the first five years of this community plan, Council has the ability to deliver against most of the goals without requiring major additional resources.

Vibrant Supportive Economy is the outcome area within the Community and Corporate plan which was identified as currently least resourced to deliver on the community's vision. Officers are considering where opportunities may exist under this outcome area, for example outdoor sport and recreation, tourism and heritage activities that could provide options for economic development.

Possible new responses were also identified, including via the Redlands Planning Scheme review, educational programs and partnerships, advocacy plans, policy development, staff training and cultural change. Relevant departments have been working to build in the detail of their Corporate plan analysis into their asset and budget planning processes. Partnerships with the state government need to be considered a focus for Council's attention over the next five years. Further identified goals may be achievable within the 20 year life vision of the plan.

2. Council's Long Term Financial Strategy: the goal of the strategy, "*to support the strategic objectives of Redland City Council whilst ensuring its short, medium and long term sustainability*" is directly aligned to Council's Community and Corporate Planning processes and the emerging focus on the financial implications of long term enterprise asset management. The financial strategy is driven by the eight outcome areas contained in Redlands 2030 and the strategic priorities given to them in the Corporate Plan. By integrating the development of the budget with these priorities Council seeks to ensure that resources are allocated to deliver the Corporate Plan priorities in a robust and sustainable manner.

The financial strategy proposes a range of policy responses to ensure Council's financial sustainability, ranging from consideration of core business, service levels and user pays, to control of growth in employee numbers and operational efficiency. These policy responses are consistent with community responses to the question of financial sustainability posed during the community planning process.

There are concerns about the levels of new infrastructure development able to be undertaken in relation to the long term asset management strategy. The current modelling clearly indicates a need to shift resources towards infrastructure renewal activities in order to achieve the policy objectives and key performance indicators target set by the state government. The categorisation and prioritisation of capital projects will underpin this shift.

Another concern is related to the impact of limiting population growth on Council's financial modelling. The community's aspiration of maintaining character and lifestyle, and maintaining a high level of environmental and conservation initiatives will drive expenditure, while population containment may decrease revenue opportunities.

3. Preparation of the 10 Year Capex: the drafting of the 10 year capital program 2009/10 – 2009/10 has commenced, using the principles and policy decisions of the financial strategy workshopped by Council in late January 2010. New

measures of sustainability have been introduced and the categorisation and prioritisation process has been introduced. Revaluation of assets and depreciation optimisation is occurring in tandem with potential new pricing and charging decisions.

A new concept of intergenerational projects supports the visions and aspirations of the community plan ie planning for the infrastructure needs of future generations. The draft 10 year capital program contains many of the initiatives outlined in the community plan goals, in particular programs identified by the community as high priorities such as the long term development, maintenance and renewal of cycleways and pathways, boat ramps, conservation land acquisitions and social infrastructure.

4. Preparation of the 10 Year Opex and annual operational plans: The financial strategy states that Council has the responsibility of delivering an operational program for the community that is not only cost effective, but also delivers tangible outcomes towards supporting and increasing services to the community of the Redlands in accordance with the objectives and priorities outlined in the Community Plan and the Corporate Plan.

Preparation of the 10 year operational program has commenced, guided by the policy commitments of the financial strategy workshops in October/November 2009. Senior managers have been directed that the operational budget follows a set of parameters produced by Financial Services. The strategic direction for the operational budget is contained in the new Corporate Plan which will be finalised by April 2010.

5. Breakthroughs: Each of the eight outcome areas contained in the Community Plan identified one or two breakthrough projects. These breakthrough projects are considered to be powerful or inspiring projects for which there is a clear commitment by council or the community. The financial impact of these projects has been considered in the table below and will be reflected in future 10 year capital and operational budgets if required.

<p><b><u>Healthy Natural Environment:</u></b>  <b>The Seven C's Project</b></p>	<p>Costs have been allocated for the creation of a report that will detail the strategy for implementation of this project. The outcomes of this report will be delivered over the short, medium and longer term. The current 10 year Capex will be re-aligned to meet the delivery process. Additional funding may also be sought through infrastructure charges and the environmental land acquisition program. It is also envisaged that some delivery may occur through the planning scheme.</p>
<p><b><u>Green Living:</u></b>  <b>Green Lane Diaries</b></p>	<p>Funding has been allocated to carry out a <i>Pilot</i> Green Lane Diaries project this year. Based on the successful evaluation of the pilot, funds from</p>

<p><b>Growing Community Gardens</b></p>	<p>external and internal sources may be requested for future projects.</p> <p>The Community Gardening policy development process is well under way within Council. There is no need for cost allocation at this phase of the project. Funds for the establishment of community gardens will be available through Council's existing community grants programs. Any internal Council costs will be considered in the policy development phase and in future council operational budgets.</p>
<p><b><u>Embracing the Bay:</u> Landmark Water Front Parks</b></p>	<p>Funds have been allocated to these projects through a major federal government grant and trunk infrastructure budgets.</p>
<p><b><u>Quandamooka Country:</u> Minjerribah Knowledge Centre</b></p>	<p>The feasibility study for this partnership project contains a financial strategy. Council has allocated some future funds for design and capital works</p>
<p><b><u>Wise Planning and Design:</u> Sustainable Redlands Study</b></p> <p><b>Revitalising Cleveland &amp; Capalaba Hearts</b></p>	<p>This project has operational funds already allocated.</p> <p>This project has operational funds already allocated.</p>
<p><b><u>Supportive Vibrant Economy:</u> Increasing Education Options</b></p>	<p>This project does not require additional resources at this stage of its development</p>
<p><b><u>Strong and Connected Communities:</u> Southern Redlands Health and Wellbeing Centre</b></p> <p><b>Youth Enterprise Centre</b></p>	<p>Budget has been allocated within the 10 year Capex for land purchase and facility development. This is a partnership project with Queensland Health and potentially other State Government departments who will be expected to contribute to the total funding package.</p> <p>This project is under way and funding allocated primarily through a major federal government grant.</p>
<p><b><u>Inclusive and Ethical Governance</u> Redlands 2030 Community</b></p>	<p>Costs for the establishment of this committee will be minimal and will sit within the departmental</p>

<p><b>Committee</b></p> <p><b>Better Communication, Stronger Engagement</b></p>	<p>budget of the project owners.</p> <p>Review of Council's engagement policy will be undertaken within existing resources. Additional budget will be required to enhance Council's communication options. Resources for communication and engagement undertaken by work units in relation to particular projects or activities will be determined during annual operational budget development. The outcome of this breakthrough will be largely achievable through cultural shift and better use of existing mechanisms.</p>
---	--

### **Embedding the Plan**

In addition to the Corporate planning and financial planning processes guiding the implementation of the Community Plan as outlined in this report, Council will undertake a planned approach to embedding the community's vision, priorities, goals and indicators into Council's organisational capability and responsiveness. Some of the actions to be undertaken to embed the community plan will include:

- Continued championing of the plan through the Executive Leadership Group
- A focussed and planned approach to translating the strategic directions of the Community Plan into decision-making frameworks and operational outcomes
- A comprehensive communications plan to increase internal and external understanding of the community plan
- Cross Council working groups to develop an integrated approach to activity planning to achieve community goals
- Projects already identified through the strategic reform framework of the Organisational Development Plan eg commitment to the four key objectives of the organisational culture, strategic planning for environmental, social and economic needs, manage and understand the organisation's environmental impacts, improved regulatory awareness and education, Corporate performance measurement, community/customer satisfaction surveys, environmental stewardship program, and organisational capacity to manage change
- Publication and launch of a clear and easy-to-read formal document and web based Redlands 2030 Community Plan which contains the text, performance measures and the verbatim voice of the community.

### **RELATIONSHIP TO CORPORATE PLAN**

The recommendation primarily supports Council's strategic priority to provide effective organisational leadership through strategic planning and accountable and ethical standards of practice.

## FINANCIAL IMPLICATIONS

Consideration of the financial implications of the Redlands 2030 Community Plan has been provided in the body of this report. Adoption of the Redlands 2030 Community Plan does not, in its own right, commit Council financially. Council will continue to be guided by its accountabilities under the *Local Government Act 2009* and its Corporate plan, long term financial strategy, long term asset management plan and annual budget processes for the detailed implementation of the Community Plan.

Redlands 2030 is a ten year plan which will be reviewed in five years. Direct costs projected for 2010/11 are linked to establishing the structures and processes to embed the plan, for example establishing the community advisory committee, monitoring and reporting on the plan, and managing the data base of community views produced during the planning process. Further expenditure will be required in 2015/16 for the review of the plan.

## PLANNING SCHEME IMPLICATIONS

The Land Use Planning Group was consulted and it is considered that the outcome of recommendations in this report will not in the short term have any impact on the Redlands Planning Scheme but in the longer term will result in possible amendments to the Redlands Planning Scheme

## CONSULTATION

The following groups support the recommendations of this report

**Redlands 2030 Working Group:-** (Roberta Bonnin, Kathy Petrik, Colette Torrance, Judy Spokes, Frank Pearce, Bernard Houston).

**Redlands 2030 Project Control Group:-** (Kerry Phillips, Luke Wallace, Phil Bucknell, Gary Photinos, Kathy Petrik, Greg Jensen, Judy Spokes, Bernard Houston, Colette Torrance, Roberta Bonnin).

**Redlands 2030 Financial Consideration Working Group:-** (Kerry Phillips, Luke Wallace, Roberta Bonnin)

## OPTIONS

### PREFERRED

That Council resolve to adopt Redlands 2030 Community Plan having been satisfied that:

1. It sufficiently outlines the engagement process undertaken by the local government with the community in the development of the plan; and
2. It satisfies the requirements within section 84 of the *Local Government Act 2009 Draft Regulations*.

### ALTERNATIVE

That Council resolve to delay the adoption of *Redlands 2030 Community Plan* to further satisfy that the *Local Government Act Draft Regulations* have been met.

---

**OFFICER'S RECOMMENDATION**

That Council resolve to adopt *Redlands 2030 Community Plan* having been satisfied that:

1. It sufficiently outlines the engagement process undertaken by the local government with the community in the development of the plan; and
2. It satisfies the requirements within section 84 of the *Local Government Act 2009 Draft Regulations*.

**COMMITTEE DISCUSSION**

After discussion it was agreed to make the following amendments to the Redlands 2030 Community Plan (attachment 1):

1. That the fourth paragraph on page 5 of 28 be amended to read:  
*We will lead Australia by acknowledging there are limits to development and having our planning documents reflect this, and through our "green living" initiatives which include sustainable building design, renewable energy, water efficiency, management of infrastructure, natural resources and waste. We will move easily around the city using efficient public transport services, pedestrian pathways and cycleways.*
2. That the fifth paragraph on page 5 of 28 be amended to read:  
*In our strong and connected community, people of all ages and backgrounds will enjoy a choice of housing, excellent medical care, active and healthy lifestyles, and opportunities to express their unique local culture through the arts, heritage, sports, festivals and events. Our robust local economy, with thriving small businesses and dynamic business centres, will provide a wide choice of jobs and educational opportunities.*
3. That a new Indicator and Target be added to table on page 8 of 28 *Healthy Natural Environment* which reads as follows:  
  
*Indicator: Biodiversity*  
*Target: Halt the decline in biodiversity and retain habitats of adequate size to ensure ecosystem functioning is maintained.*
4. That the target relating to Indicator: *Health of the Bay (Spatial mapping)* on page 12 of 28 of *Embracing the Bay* be amended to read as follows:  
*Increase the extent and distribution of seagrass beds, saltmarsh and decrease the occurrence, extent and distribution of lyngbya.*
5. That the first paragraph of Page 15 of 28 under heading *Wise Planning and Design* be amended to read:  
*We will carefully manage population pressures and use land sustainably while advocating to determine the limits of growth on a local and national basis, recognising environmental sensitivities and the distinctive character, heritage and atmosphere of local communities. A well-planned network of urban, rural and*

*bushland areas and responsive infrastructure and transport systems will support strong, healthy communities.*

6. That point 7 under *Planning for a liveable city – Goals* Page 15 of 28 be amended to read:
  7. *Housing options meet different needs – a mix of housing suitable for all household groupings makes efficient use of land within the urban footprint and encourages a range of affordable housing options which includes the retention of existing low density residential option and protection from intensification or encroachment of other uses.*
7. That point 11 under *Prioritising public infrastructure – Goals* Page 16 of 28 be amended to read:
  11. *Connections within and around the Redlands – in line with sustainability; new transit systems, improved roads, car parks and public transport options to keep pace with population growth; and, increase connectivity in and around the Redlands, and most notably with the Bay islands, Brisbane and the Gold Coast.*
8. That the target relating to *Wise Planning and Design*, Indicator: *Population growth (State of the Environment Report)* be amended to read:  
*Annual population figures meet the objectives set in line with agreed carrying capacity.*

#### **COMMITTEE RECOMMENDATION**

Moved by: Cr Henry  
Seconded by: Cr Hobson

That Council adopt *Redlands 2030 Community Plan* as amended having been satisfied that:

1. It sufficiently outlines the engagement process undertaken by the local government with the community in the development of the plan;
2. It represents, to the best knowledge of the Council, after an extensive community consultation and engagement process, the wishes of the community; and
3. It satisfies the requirements within section 84 “Community Plan Contents” of the draft *Local Government (Finance, Plans and Reporting) Regulations 2009*.

A division was called for at Committee

Crs Reimers, Elliott, Hobson, Townsend, Henry, Ogilvie, Boglary and Bowler voted in the affirmative.

Crs Murray and Williams voted in the negative.

Cr Burns was absent from the Committee meeting.

The motion was declared by the Chair as **CARRIED** at Committee.

### **COUNCIL DISCUSSION**

Further amendments to the 2030 Community Plan were agreed as follows:

1. That the fourth paragraph on page 5 of 28 be amended to read:

*“We will lead Australia by acknowledging there are limits to population growth and having our planning documents reflect this, and through our “green living” initiatives which include sustainable building design, renewable energy, water efficiency, management of infrastructure, natural resources and waste. We will move easily around the city using efficient public transport services, pedestrian pathways and cycleways.”*

2. That the first paragraph of page 15 of 28 under heading *Wise Planning and Design* be amended to read:

*“We will carefully manage population pressures and use land sustainably while advocating and taking steps to determine the limits of growth and carrying capacity on a local and national basis, recognising environmental sensitivities and the distinctive character, heritage and atmosphere of local communities. A well-planned network of urban, rural and bushland areas and responsive infrastructure and transport systems will support strong, healthy communities.”*

3. That the target relating to *Embracing the Bay*, Indicator: *Health of the Bay (Spatial Planning)* on page 12 of 28 be amended to read:

*“Increase the extent and distribution of seagrass beds.*

4. That point 11 under *Prioritising public infrastructure – Goals* Page 16 of 28 be amended to read:

11. *“Connections within and around the Redlands – in line with sustainability; new transit systems, improved roads, car parks and public transport options to keep pace with demand; and, increase connectivity in and around the Redlands, and most notably with the Bay islands, Brisbane and the Gold Coast.”*

**COUNCIL RESOLUTION**

Moved by: Cr Henry  
Seconded by: Cr Bowler

**That Council adopt *Redlands 2030 Community Plan* as amended having been satisfied that:**

- 1. It sufficiently outlines the engagement process undertaken by the local government with the community in the development of the plan;**
- 2. It represents, to the best knowledge of the Council, after an extensive community consultation and engagement process, the wishes of the community; and**
- 3. It satisfies the requirements within section 84 “Community Plan Contents” of the draft *Local Government (Finance, Plans and Reporting) Regulations 2009*.**

**PROCEDURAL MOTION**

Moved by: Cr Ogilvie  
Seconded by: Cr Boglary

That this item lie on the table.

CARRIED

In accordance with part 3, Division 5, Section 29(7) of Subordinate Local Law No. 5 (Meetings), a procedural motion is required, *‘that the item be taken from the table’* before the matter can be considered and concluded.

**PROCEDURAL MOTION**

Moved by: Cr Ogilvie  
Seconded by: Cr Reimers

That this item be taken from the table.

CARRIED

On being put to the vote, the motion was **CARRIED**.

A division was called for.

Crs Boglary, Ogilvie, Henry, Townsend, Bowler, Reimers and Murray voted in the affirmative.

Crs Williams, Murray and Burns voted in the negative.

Cr Hobson was absent from the meeting.

The motion was declared by the Deputy Mayor as **CARRIED**.
