Introduction

This DEMOGRAPHIC profile provides an analysis of the first release tables from the 2001 Census of Population and Housing Basic Community Profile as well as additional unpublished census data, the latest population and building approval figures. The current DEMOGRAPHIC profile will be expanded upon when the second release tables become available in November 2002. The expanded profile will include analysis of the second release tables (which include information on the labour force, industries, occupations, income and qualifications), as well as information from other sources including the Department's purchase of special customised tables.

DEMOGRAPHIC profiles are available for areas throughout Queensland, including Local Government Areas, Statistical Local Areas (suburbs), urban centres, towns and postcodes. A profile can also be designed to provide a comparison between an area (e.g. Local Government Area) and its respective region (e.g. Statistical Division) or between a number of areas (e.g. All Local Government Areas in a Statistical Division).

Population change

- On Census night (7 August 2001), 3,381 people were counted in Thorneside, representing an increase of 12 people or 0.1% per annum since the 1996 Census.
- The estimated resident population of Thorneside at 30 June 2001 was 3,502 people, representing an increase of 3 people since 1996.
- In comparison, Queensland's average annual growth rate in the 1996 to 2001 period was 1.7%.

Census counts: Number of people counted in an area on Census night. Census counts include usual residents who were at home, as well as visitors from elsewhere in Australia or from overseas. Australian residents elsewhere in Australia or temporarily overseas at the time of the Census are excluded from the area.

Estimated resident population: Number of people estimated to be usual residents of an area. Census count is adjusted to exclude people not usually resident in the area and include people usually resident who were elsewhere on Census night. Further adjustments take into account Census under-enumeration and persons who usually reside in the area but were temporarily overseas on Census night.

2001 Census publications

The Planning Information and Forecasting Unit (PIFU) has a range of publications and web-based products to provide you with a comprehensive analysis of the 2001 Census data.

In addition to the DEMOGRAPHIC profile, CENSUS Highlights 1 (released in early July) includes an analysis for Queensland of key demographic characteristics such as age, birthplace, relationship in household and dwelling structure, based on the first release of Census data. CENSUS Highlights 2 will follow in December 2002. This edition will contain an analysis of the second release of Census data (labour force, industry, occupation, income, qualifications).

PIFU has expertise in statistical analysis, social statistics, preparation of demographic profiles and population forecasting. Specialised services include analysis, interpretation and value-adding to Census data, and compilation of demographic data for customised consultancies in both the public and private sectors.
