Common Redlands Birds

Common Birds: These birds are often observed around the Redlands and are not included in the individual site descriptions

Australian Magpie, Australian Pelican, Australian White Ibis, Australian Wood Duck, Pacific Black Duck, Common (Indian) Myna, Spotted Dove, Crested Pigeon, Galah, Grey Butcherbird, Pied Butcherbird, Laughing Kookaburra, Little Corella, Magpie-lark, Masked Lapwing, Black-faced Cuck oo-shrike, Australasian Figbird, Noisy Miner, Feral Pigeon, Rainbow Lorikeet, Silver Gull, Sulphur-crested Cockatoo, Torresian Crow, Welcome Swallow, Willie Wagtail, Blue-faced Honeyeater, Lewin's Honeyeater, Yellow-faced Honeyeater*, Scarlet Honeyeater*, Grey Fantail*, Striated Pardalote, Silvereye, Rufous Whistler, Little Pied Cormorant, Little Black Cormorant,

Site Notes: Descriptions provide location addresses, UBD reference numbers and a list of interesting species one can see at the site depending on the time of year. Species lists were compiled using data from Birdata, eBird.org and cross-checked by local birders. Migratory or nomadic species are marked with an * and can be seen on a seasonal basis.

Safety: The Redlands experiences a sub-tropical climate. Please wear sunscreen, a hat and carry insect repellent and water all year round. Closed shoes are also a must at all birding sites. Check yourself for ticks regularly.

Redland City Council is proud to provide funding for the Bird Places of the Redlands Brochure as part of the Community Grants Program to assist the Redlands Community.
