

Eastern Escarpment Conservation Area

Open 4am-10pm daily

Discovering the trails

Single-use (downhill) trails

Difficult Trails (Black Diamond)

For experienced mountain bikers. Challenging trails, large unavoidable obstacles and features, long steep descents and loose surfaces.

Trail Name	Distance
Blacking Out (one way)	700m
Westy's (one way)	757m

Shared-use trails

Easy Trails

For beginner cyclists with basic bike skills and for most bikes. Wide trails, gentle gradient, smooth surface for mountain biking and walking. Easy shared-use mountain biking and walking trails are marked in a solid green line on the map.

Trail Name	Distance
Up The Creek	550m
Easy Street (aMTB)	800m
Crosscut (aMTB)	548m
Adapt (aMTB)	520m

Intermediate trails

For skilled mountain bikers with mountain bikes. More challenging single trails with moderate, variable surface. Natural or purpose-built technical trail features and obstacles and may include steep sections.

Trail Name	Distance
Leo Lands	5200m
Cotton Canyon Part 1	1800m
Cotton Canyon Part 2	1000m
Powerful Howl (aMTB)	900m
Shenanigans (difficult sections) (one way)	1700m
Rise Over Run	924m
Escalade	1500m
Piccabeen	900m
Metamorphic	2100m

IN AN EMERGENCY CALL '000'

Locate the nearest trail marker sign and quote the location number to emergency services

Multi-use walking, mountain biking and horse riding trails (fire trails)

Easy Multi-use trails

Trail Name	Distance
Woodlands Trail	1200m
Schoeck Break	920m
Creek Break	621m
Upper Main Trail	1767m
Lower Main Trail	1550m
Traction Fraction (difficult sections)	1000m
Summit Track (difficult sections)	1100m
Gate 1 Break	184m
Gate 3 Break	375m
Gate 4 Break	382m

Difficult Multi-use trails

Trail Name	Distance
Summit Track (easy sections)	1100m

These trails are great for horse riders and are also popular with MTB riders and walkers. They are vehicle width trails and generally graded as easy. Multi-use walking, mountain biking and horse riding trails (fire trails) are shown as purple lines on the map but may be bordered by black where they are more challenging. The challenging terrain of Eastern Escarpment means gradients in some sections may not be suitable for all horses or bike riders.

Note: trails may have gravel - horse riders are encouraged to shoe their horses.

Adaptive (aMTB) Trails

Shared-use: Easy There are a number of 'easy' green level aMTB suitable trails including Crosscut, Adapt and Easy Street.

Shared-use: Intermediate There is one designated 'intermediate' blue level aMTB suitable trail - Powerful Howl. However, other trails may be explored depending on the rider's skills, confidence, trail knowledge and support.

Trail Name	Distance
Crosscut	548m
Adapt	520m
Easy Street	800m
Powerful Howl	900m

Multi-use trails: Many fire trails are suitable for aMTB riders to get around the reserve. Some sections may not be suitable for all aMTB riders.

Making the most of your visit

Trail etiquette

When using trails on Redlands Coast, be sure to follow some simple trail etiquette:

- Stay on tracks - don't cut corners
- Use tracks only in dry weather - we may choose to close the park in wet conditions to preserve tracks
- Obey all signs
- Respect wildlife
- Be considerate in protecting our bushland area and keeping them enjoyable for all - please pick up your horses droppings and clean hoofs where possible to help stop spread of weeds

Note: The surrounding land around EECA is privately owned - it is important to stick to trails within the reserve to avoid trespassing.

Cycling Safety - mountain bike ride within your own capability

- All trail users do so at their own risk
- Multi-use tracks contain drainage humps and loose surface - approach drainage humps and corners slowly
- Control your speed when riding downhill
- If you have inexperienced bike riders in your group, remain together on easier trails
- Be aware of changes in riding conditions caused by wind or rain
