

Home Dialysis Rebate Application

Eligibility

A rebate under Council's Revenue Statement is provided by council on water consumption charges that have been calculated on residential water rates, where the water consumption of a household is increased above normal usage for the billed period.

In the event where the resident dependent on haemodialysis treatment is a tenant of the property, evidence in the form of a copy of the lease agreement or a letter from the property owner or their representative must be provided with the application form. The evidence must show the tenant is responsible for the billed water consumption charges. Council will in good faith apply the rebate to the property rate account with the expectation the rebate will be passed onto the tenant.

Continuing eligibility for the rebate will be subject to annual confirmation from the treating hospital of the average kilolitres per annum that will be used by the dialysis machine in the treatment.

Calculation

An allowance of 100% on the water usage calculated above normal usage, based on current information provided by SEQ Water, up to but not exceeding the quarterly allowance for the billed period. An exception exists where the actual usage does not exceed the normal usage calculated for the average number of persons resident in the home for the water consumption period. In this instance, a rebate will not be applied.
