Hi [redacted]

The good news is that the works have been completed [redacted] has removed the pipes that were discharging [redacted]. These have been redirected to a rubble pit that has been constructed where the stormwater will be discharged.

This should reduce the amount of stormwater being directed [redacted] however will not stop the surface water from finding the lowest point and possibly entering your property.

I trust that this resolves your enquiry in respect to the stormwater matter.

Kind regards

[redacted]

Hi [redacted]

[redacted] has exposed these pipes so that [redacted] can redirect the stormwater away [redacted] to an approved discharge point as [redacted] has been directed.

Regards

Attention: [redacted]

Your Ref: CRDC522428

Dear [redacted]

Further to my email of 13/03/2020, please find attached a photo of the rubble stormwater pit I have constructed [redacted] soon after it was filled with 20 mm concrete rubble, and one of the same area now topped with paving slabs. We hope that this corner of our property will now deal more effectively with the excess overland flow [redacted] during severe downpours. Please advise if this is satisfactory from council's perspective.

Yours sincerely,

[redacted]
