

# Community Grants Program

## 2025 – Capital Infrastructure Grant

### Awarded Applications

Grant ID	Organisation Name	Project Title	Approval Amount
MC-25-005	Redlands United FC	<u>Converting Field 1 &amp; 2 to LED Lighting</u> The project will involve the removal of the existing outdated lighting system, followed by the development of an engineered lighting plan designed for long-term reliability, efficiency, and performance. The new system will be planned with future use in mind, ensuring it remains effective and sustainable over the next decade. Upon finalization of the design, the new lighting system will be professionally installed.	\$ 50,000.00
MC-25-006	Redland Yurara Art Society Inc.	<u>Replacement of Air Conditioning Units</u> The existing split system air conditioning units, one in the studio and one in the gallery have ceased to function and need to be replaced. Air conditioning is vital to ongoing use of both the Gallery and the Studio. Art works in the Gallery need to be kept in a well-regulated temperature, as well as providing for the comfort of patrons and visitors.	\$ 7,370.00
MC-25-013	Redland Bay Men's Shed Inc	<u>Resolve Excessive Noise in Main Meeting Area</u> Certified contractor to apply acoustic ceiling tiles to recreation room to resolve excess noise resulting from hard surface resonance issues which causes debilitating and unsatisfactory sound levels from normal conversation in main meeting room.	\$ 9,000.00
MC-25-016	Redlands Church of Christ Inc - The Bush Oasis Op Shop & Cafe	<u>The Bush Oasis Op Shop &amp; Cafe - Repairing Community Event Space</u> This project involves the replacement of the current, deteriorated shade sail with a waterproof cover and removing the uneven ground covering and replacing with level concrete and drainage.	\$ 10,000.00
MC-25-017	Redland Coast Art Society Inc.	<u>Shed &amp; Installation</u> The project involves the acquisition and professional installation of a durable, weather-resistant Colorbond storage shed to be strategically placed at the side of the building. This addition is designed to enhance the facility's capacity for secure and organized storage of essential equipment and materials. By positioning the shed in a discreet yet accessible location, it minimizes visual impact while maximizing functional utility. This investment will support operational efficiency, protect valuable assets, and contribute to the overall improvement and sustainability of the premises.	\$ 10,000.00
MC-25-018	Macleay Island Bowls Club Inc	<u>Kitchen Splashback Upgrade</u> The project involves upgrading the old and cracked ceramic tile splashback in the kitchen to stainless steel, to improve food safety and hygiene. All works will be undertaken by licensed and experienced contractors.	\$ 10,000.00
